

Smart Home Device Positioning Snapshot

Canada Rollout

Overview

A reference sheet capturing device types, recommended placements, and deployment phases for the Canadian rollout of smart home solutions.

Device Positioning Matrix

Device	Recommended Location	Purpose	Deployment Phase	
Hub	Smart Home Hub	Central Living Area	Connects and controls all devices	Phase 1
	Smart Thermostat	Main Hallway	Optimize home heating & cooling	Phase 1
	Security Camera	Entrances, Backyard	Monitor & enhance security	Phase 2
Light	Smart Light Bulb	Living Room, Bedrooms	Automate lighting	Phase 2
Plug	Smart Plug	Kitchen, Home Office	Remote power control	Phase 3

Notes

- Placement recommendations consider typical Canadian home layouts.
- Device rollout prioritizes core connectivity and security, followed by comfort automation.
- Adjustments may be required for regional infrastructure differences.
