Acme Tech Unveils Next-Gen Smart Speaker: AcmeHome One

San Francisco, CA — Acme Tech, a leader in consumer electronics, today announced the launch of **AcmeHome One**, the company's newest smart speaker designed to elevate home experiences with intuitive voice controls, premium sound, and seamless smart home integration.

Reimagining Modern Living

AcmeHome One is powered by the latest Acme Voice OS, enabling users to manage entertainment, control smart devices, and access information with simple voice commands. Its minimalist design complements any living space, while the adaptive audio technology delivers immersive, room-filling sound.

Key Features

- Far-field voice recognition for accurate, hands-free interaction
- Seamless integration with over 500+ smart home devices
- High-fidelity speakers with dynamic bass enhancement
- Privacy-first architecture with built-in mute and encryption

Availability

AcmeHome One is available for pre-order starting today at
