Date:

June 17, 2024

1. Executive Summary

This IT Compliance Audit was conducted for Client Company Name to review its processes and IT controls relating to industry regulations and best practices. The objective was to evaluate alignment with compliance frameworks and suggest improvements to mitigate risk and ensure regulatory adherence.

2. Scope and Objectives

- Review of IT policies and procedures
- Assessment of data security and privacy controls
- Evaluation of access management
- Verification of system and network controls
- Inspection of incident response processes

3. Methodology

- Interviews with stakeholders and IT staff
- Review of documentation
- Technical testing and sample checks
- Gap analysis against compliance standards

4. Findings & Recommendations

#	Area	Finding	Recommendation	Priority
1	Access Control	User accounts are not reviewed regularly.	Implement quarterly access reviews.	High
2	Data Security	Sensitive data is stored unencrypted.	Enable encryption for sensitive data.	High
3	Incident Response	No formal incident response plan documented.	Develop and document an incident response plan.	Medium
4	Policy Management	IT policies are outdated.	Review and update IT policies annually.	Medium

5. Conclusion

The audit identified areas where compliance can be improved by implementing recommended controls and policy updates. Management is encouraged to prioritize high-risk findings and establish a regular review process for ongoing compliance.
