

Collaborative Source Code Review Summary

Project Information

- **Project Name:** [Sample Project]
- **Repository URL:** [https://github.com/example/repo]
- **Review Date:** [YYYY-MM-DD]
- **Reviewers:** Alice Smith, Bob Lee, Chris Evans

Review Overview

Area	Comments	Status
Code Quality	Consistent formatting; improve variable naming.	Action Needed
Functionality	Endpoints work as expected in test cases.	Approved
Security	Sanitize user input in <code>login.js</code> .	Action Needed
Documentation	README needs usage examples.	Action Needed

Key Issues & Action Items

1. Refactor authentication logic (`auth.js`) for clarity.
2. Add input validation to forms.
3. Expand unit tests for `api/routes/user.js`.
4. Update documentation for new endpoints.

General Feedback

- Team collaboration and committer practices are improving.
- Consider adopting standard linting tools.
- Overall structure is maintainable with minor improvements needed.
