

IoT Light Bulb User Manual

1. Introduction

Thank you for choosing the IoT Light Bulb. This manual provides essential information to install, configure, and use your smart bulb.

2. What's in the Box

- 1x IoT Light Bulb
- 1x Quick Start Guide

3. Specifications

Parameter	Details
Model	SmartBulb 1000
Power	9W
Voltage	AC 100-240V, 50/60Hz
Wireless	WiFi 2.4GHz
Color	RGB + Warm/Cool White

4. Installation

1. Ensure the power is off before installation.
2. Screw the bulb into an E27 socket.
3. Turn on the power. The bulb will blink to indicate pairing mode.

5. App Setup

1. Download and install the "SmartHome" app from your device's App Store.
2. Create or log in to your account.
3. Tap "+" to add a new device and select "Light Bulb".
4. Follow on-screen instructions to connect your bulb to WiFi.

6. Basic Operations

- **Turn On/Off:** Use the app or your voice assistant.
- **Adjust Brightness:** Drag the slider in the app.
- **Change Color:** Select your desired color in the app.
- **Set Schedules:** Automate on/off times via the app.

7. Troubleshooting

- If the bulb won't connect, reset it by toggling power 3 times.
- Ensure your WiFi is 2.4GHz and the signal is strong.

8. Safety Information

- Do not use with dimmer switches.
- Avoid exposure to water or high humidity.
- Disconnect power before installation or removal.

9. Warranty & Support

This product comes with a 1-year limited warranty. For support, please visit our website or contact our customer service.
