

# Major Update Release Notes

**Version:** 4.0.0

**Release Date:** June 10, 2024

## What's New

- Completely redesigned dashboard for improved navigation and insights.
- Advanced reporting module with export customizable options.
- Single Sign-On (SSO) integration with industry-standard platforms.

## Enhancements

- Performance optimized: average load times reduced by 25%.
- User search extended to support filtering by multiple fields.
- More detailed audit logs with export capabilities.
- Refined notifications system with improved delivery accuracy.

## Bug Fixes

- Resolved issue causing duplicate entries in the user list.
- Fixed rare logout failure after prolonged inactivity.
- Addressed timezone mismatch affecting scheduling accuracy.
- Resolved incorrect display of permissions in the role management view.

## Breaking Changes

- The legacy `/api/v1/reports` endpoint has been deprecated. Please migrate to `/api/v2/reports`.
- Support for Internet Explorer 11 has been removed.

## Known Issues

- Report export does not support .xls format; only .csv is available currently.
- Some users may experience temporary caching issues after update; clearing browser cache resolves the problem.
