Cloud Infrastructure Vulnerability Assessment

1. Assessment Overview

Project Name	
Assessment Date	
Assessed By	
Client/Organization	
Scope	

2. Methodology

1. Information Gathering
2. Vulnerability Identification
3. Analysis & Verification
4. Reporting

3. Infrastructure Components in Scope

- Compute (e.g., Virtual Machines, Instances)
- Storage (e.g., Buckets, Disks)
- Networking (e.g., VPC, Firewalls)
- Identity & Access Management (IAM)
- Others:

4. Vulnerability Findings Summary

ID	Vulnerability Title	Severity	Asset	Status

5. Detailed Vulnerability Findings

[Finding Title]

ID	
Asset	
Severity	
Description	
Evidence	
Impact	
Recommendation	
Status	

6. Conclusion

7. Appendix
