

# API Improvements Release Notes

## Marketing Automation Suite

**Release Version:** 2.5.0

**Release Date:** June 20, 2024

## Enhancements

- **Bulk Contact Import**

`POST /v2/contacts/bulk-import`

Improved validation messages and support for custom fields during bulk import.

- **Dynamic Campaign Status Updates**

`GET /v2/campaigns/{id}/status`

Reduced response times and included new status detail field `failedReasons`.

- **Searchable Tags for Email Templates**

`GET /v2/email-templates?tags=tag1,tag2`

Email templates can now be filtered by multiple tags.

## New Endpoints

- **Retrieve Custom Field Definitions**

`GET /v2/contacts/custom-fields`

Fetch the list of available contact custom fields for your account.

- **Update Subscription Preferences**

`PATCH /v2/contacts/{id}/preferences`

Allows granular updates to contact communication preferences.

## Fixes

- Fixed an issue where `/v2/automations/trigger` occasionally returned a timeout for complex triggers.
- Resolved inconsistent pagination metadata on `/v2/contacts` endpoint.
- Corrected the default sorting order for `/v2/forms/list` results.

## Deprecations

- `GET /v1/campaigns/list`

Deprecated in favor of `/v2/campaigns`. Will be removed after September 2024.

- `POST /v1/contacts/upload`

Use `/v2/contacts/bulk-import` for improved experience and support.
