

Security Patch Release Notes

Product: Cloud Collaboration Platform

Release Version: 2024.06.15

Release Date: June 15, 2024

Overview

This security patch addresses multiple vulnerabilities identified in previous releases of the Cloud Collaboration Platform. Users are advised to update to the latest version at the earliest opportunity to ensure system protection and stability.

Vulnerabilities Fixed

| CVE ID | Description | Severity | Impact |
|----------------|---|----------|--------------------------------------|
| CVE-2024-12345 | Improper input validation in file upload API. | High | Potential remote code execution. |
| CVE-2024-12346 | Session fixation issue in authentication module. | Medium | Unauthorized session access risk. |
| CVE-2024-12347 | Cross-site scripting vulnerability in chat message preview. | Medium | Possible exposure of sensitive data. |

Mitigations

- Enhanced validation for file uploads and input data.
- Strengthened session management and regeneration of session IDs after login.
- Implemented stricter content sanitization in chat previews.

Upgrade Instructions

- Back up your server and database before applying the patch.
- Download the latest patch from the Support Portal or email
