

Intelligent Window Blinds Controller Manual Example

1. Introduction

Thank you for choosing the Intelligent Window Blinds Controller. This device allows you to automate your window blinds with ease, enabling both manual and scheduled control for optimal light and privacy.

2. Safety Instructions

- Read all instructions before installation or operation.
- Avoid exposure to water or moisture.
- Disconnect power supply before cleaning or maintenance.
- Do not attempt to open or repair the device yourself.

3. Product Overview

1. Window Blinds Controller Unit
2. Power Adapter
3. User Manual
4. Mounting Accessories

4. Installation

1. Attach the controller to the window frame using the included accessories.
2. Connect the device to a compatible power outlet.
3. Pair the controller with your mobile app by following the in-app prompts.

5. Operating Instructions

5.1 Manual Operation

- Use the touch panel on the controller to raise or lower the blinds.
- Hold the up or down indicator until the desired position is reached.

5.2 Scheduled Automation

- Open the companion app and set timers for automatic adjustment throughout the day.
- Save your schedule and ensure the controller has a stable connection.

6. Troubleshooting

Issue	Possible Solution
Blinds not responding	Check power connection and ensure controller is properly paired with app.
Unusual noise during operation	Stop using and inspect blinds for obstructions. Contact support if the issue persists.
Cannot set schedule	Update the app and verify internet connectivity.

7. Specifications

- Input Voltage: 5V DC
- Wireless: Wi-Fi 2.4 GHz

- Compatibility: iOS & Android
- Supported Blind Types: Roller, Venetian
