

Smart Door Lock Instruction Manual

Model: SL-900

Package Contents: Smart Door Lock, 4x AA Batteries, 2 Physical Keys, Installation Kit, Instruction Manual

1. Product Overview

- Keyless entry with PIN code, RFID card, and backup key.
- Low battery alert and emergency power port.
- Auto-lock and one-touch lock features.

2. Installation

1. Remove existing door lock set.
2. Align the smart lock with your door and mark screw locations.
3. Install the lock following the diagram included in the package.
4. Insert the 4 AA batteries into the compartment.
5. Test manual lock/unlock operation before closing the door.

3. Setup & Operation

3.1 Setting the Master Code

1. Press and hold the "Setting" button inside the battery compartment for 3 seconds until you hear a beep.
2. Enter your desired master code (4-8 digits), then press "#".
3. Wait for a confirmation beep.

3.2 Adding User Codes

1. Enter the master code, then press "#".
2. Press "1" to enter user code mode.
3. Enter a new user code, then press "#".
4. Repeat to add up to 20 user codes.

3.3 Locking and Unlocking

- To lock: Press "*" or close the door (auto-lock).
- To unlock: Enter user code and press "#", or tap valid RFID card.
- Use a backup key if electronic entry fails.

4. Trouble Shooting

Issue	Solution
Lock does not respond	Check battery orientation or replace batteries.
Forgotten master code	Reset to factory settings using reset button.
Door does not lock/unlock smoothly	Ensure installation is aligned and not obstructed.

5. Safety & Maintenance

- Replace all batteries at the same time.
- Do not expose to water or extreme temperatures.
- Contact support for assistance if problems persist.

6. Warranty

12-month limited warranty from date of purchase. Please keep your proof of purchase for service.
