

Soil Erosion and Sediment Control Plan

1. Project Information

Project Name: _____

Project Address/Location: _____

Owner/Developer: _____

Contact Person: _____ Phone: _____

Date: _____

2. Project Description

Briefly describe the nature of the construction activity, total project area, existing site conditions, and estimated schedule:

3. Site Map

Attach a site map illustrating:

- Property boundaries
- Existing and proposed structures
- Topographic features
- Areas of soil disturbance
- Locations of soil stockpiles
- Erosion and sediment control measures

4. Existing Site Conditions

1. Describe vegetation, slopes, soil types, and drainage patterns:
2. Describe off-site areas that may be affected:

5. Erosion and Sediment Control Measures

List and describe all proposed control measures:

Control Measure	Location	Description	Installation Date
Example: Silt Fence	North boundary	Prevents sediment from leaving site	MM/DD/YYYY

6. Sequence of Construction Activities

1. Clearing and grubbing
2. Grading and earthwork
3. Infrastructure installation
4. Final grading and landscaping
5. Removal of control measures

7. Maintenance and Inspection

1. Describe the inspection schedule and maintenance procedures:

8. Responsible Personnel

Personnel responsible for plan implementation, inspection, and maintenance:

Name: _____ Role: _____

Contact Info: _____

9. Certification

I certify that the information submitted is accurate and the plan will be implemented as stated.

Signature: _____ Date: _____
